CORINNE KAAS

WELCOME *friends!*

THIS IS US!

Hello Home Owners! It is always exciting when you decide that it is time to give your home a fresh look. We are so happy that you found us! Together, my husband Craig and I are a team that founded Harmonizing Homes in 2009 in Toms River, New Jersey. I create the designs and develop the ideas and he, along with my son Brad, put the plans into action. I also want to acknowledge the help of my daughter, Dawn, who helped kick off Harmonize Homes website. We are very excited to welcome the newest member of our design team, Charles Messenger, who joined our family company in August 2015. Charles will be assisting me with design concepts and planning. As a service provider, we pride ourselves in getting to know our clients as a number one priority. We are happy to say that many of our clients are now among our dearest friends.

We recently purchased a new home with a full woodworking shop, a painting studio, and storage for our home staging inventory. As you can certainly tell, we are a full service design team that can turn your dreams in reality!

THE
Design
EXPERIENCE

OUR PHILOSOPHY | I'm sure your mind is racing and you are feeling overwhelmed with the amount of choices that are out in the market to begin your design journey. When you decide it is time to do something different to your home, you are spending countless hours on Pinterest and Houzz. Your coffee table is covered with home design magazines and you find yourself watching re-runs of HGTV on a regular basis. Our goal at Harmonizing Homes is to make the design process less stressful. You deserve a beautiful home that you worked so hard for. When I think back to our first home we purchased when we were first married with two little babies it brings back a smile. We decorated with JCPenny's slipcovers to dress up the hand-me-down couches and chairs. I bought fabric and made my own curtains and cut wild flowers to place in a vase. However small the design process is, we want to put a smile on your face and help to create an enjoyable and stress-free experience.

T H E P R O C E S S | The design process has various steps. To ease your mind and to help layout the scope of how a new design will work here are the general guidelines to working with your new designers. After contacting us we will arrange a first initial meeting to discover what it is that you want in your new design. Following our first meeting, we will arrange for a second meeting where we will come to your home to get site measurements (this meeting can merge with the first meeting if you are ready to take the leap and move forward with the process!). Once we have the measurements, we will create space plans to layout your new design and we will also start researching possible furniture and materials.

Once we have the plans drawn up and some furniture options picked out we will arrange for another meeting to present the plans and the selected options. Next, we will make any changes to the space plans as necessary or if you agree to a space plan then we can begin contacting other members of the trade to discuss contract work, installations, painting, etc. as required. Throughout the process we will be back and forth discussing furniture, fabrics, paint, finishes, materials, etc. Once options have been selected the design team will begin placing the orders with our vendors. When the client is ready to move forward with the work, the designers will schedule a time for the contractors, installers, painters, etc. to conduct the work as required. Once all work is completed the designers will arrange for the final order and delivery of furniture and arrange all pieces as per the selected space plan. Throughout the design process we will spend some additional time shopping for miscellaneous accessories for the new design.

WHY INVEST ?

Your first decision as a home owner is to set priorities for your new home design. You have to decide what you value the most. Is it the grand entrance? The kitchen? The living room? The bedroom? As a home owner AND designer I believe that home owners having interior design work done should make photography a top priority. After all of the work is complete, after all of the flooring is installed, the paint is fresh on the walls, and furniture moved in, life moves on! You have spent weeks, months, maybe even years redesigning your home. If you choose to invest in high-quality photography to capture the new found beauty of your home, then we offer Home Legacy Albums for our clients. You will receive high-quality images wrapped in bound album. This is a great way to end a long journey and it's a keep sake that you can show your friends and family.

THE HARMONIZING HOMES EXPERIENCE

MEETINGS :

We are more than willing to travel for all design services offered! We book initial meetings in as little as one week and 60 miles of travel are included at no cost.

OUR DESIGN STYLE :

We love being interactive and hands-on throughout the design process. There will be many parts of the process in which we will take control in order to accomplish everything that needs to be done while staying on schedule. We will be involved every step of the way, concept to completion. We will be at the job site while work is in progress to ensure that the work is not only being done, but being done correctly.

COVERAGE :

We are often asked by potential clients if we only provide design services to upscale homes. The answer to that question is NO! No matter what the scope of the project is, large or small, we will happily be there to guide you every step of the way.

B O O K I N G :

We know that you are eager to take the next step in making your home better than ever, and we are eager to help you! However, we need to stress that there are many others like you eager to give their homes a fresh look as well. We ask that you please have patience if you choose to hire our services. Allow for one to two weeks between appointments. Although we ask for a 1-2 week window, we would be more than happy to make other arrangements when necessary!

C O N T A C T :

Often times we will contact you or ask that you contact us through email. Through this method we are able to maintain digital records of our design discussions both as client and designer. A benefit of this is that we are able to accept a virtual “okay” via email as digital signature to move forward with design work.
